FRIENDS OF THE ARMY MEDICAL LIBRARY

Washington, D. C.

### WHAT TIME IS IT

I couldn't define Time until I had had a peek at the Encyclopedia Britannica. It is a general term used for the experience of duration but soon splits up into sub-experiences and finally ends somewhere within the domain of music in the company of breves, crotchets and quavers.

Some years ago while traveling in Canada, I found myself bothered not only with Eastern, Central, Mountain, and Pacific time, but with a fifth variety - Atlantic, which seems to be used only in New Brunswick. On top of that there was, of course, Daylight Saving. So it happened that my watch was sometimes as much as three hours off key. Out on the fringe of our solar system a few hours or a few billion years are all equally unimportant, but I suppose down here most of us who carry watches feel that we should know how the hours are passing.

Time seems of little value to youth which is continually wasting it, saving at the spigot and leaving the bung hole open. Old age would set the clock back if it could, but the only thing that is permitted that liberty is the Congress of the United States when it is not in the mood to adjourn.

Once I overheard an argument somewhere in the Pine Tree State over whether or not duplicates of one's Lares and Penates were always to be desired. The crowning sally for the affirmative was the triumphant question, "Well, can you think of anything in your house or about your house of which you couldn't use a duplicate?" The reply was, "Yes, I certainly couldn't use twin sun dials on the coast of Maine."

I am always setting watches and clocks by telephone. A sweet voice says, "Save money by the Wickey Wackey plan. Time, eight thirty-two!" and snap goes my watch, up thirty seconds. Some people worry considerably about their time keepers, more so than about their health. A myopic but methodical friend of a friend of mine was so particular in this respect that he was once discovered in the basement attempting to regulate his watch from the dial of a water pressure indicator attached to the furnace! After all what is a little time if you're not in a hurry?

H.W.J.

---

CURRENT LIST OF MEDICAL LITERATURE is published weekly and lists of RECENT BOOK ACQUISITIONS are issued several times per year as supplements. The subscription price for both is \$5.00 per year in the United States and \$5.50 per year in other countries. The Recent Book Acquisitions may be obtained separately at \$1.00 per year. Address communications to:

Medicofilm Service  
Army Medical Library,  
Washington, D.C.

### 3. Bacteriology, Microbiology

*Mycologia*, Lancaster, 1941, 33:

- DEARNESS, J. New species of Tennessee fungi. 360-6.  
JENKINS, A.E., KRUG, H.P., & CASH, E.K. New or little known ascomycetes collected in Sao Paulo in 1936. 390-404.

### 4. Biology

*Austral. J. Exp. Biol.*, 1941, 19:

- KELLAWAY, C.H., & TRETHERWIE, E.R. The injury of tissue cells and the liberation of pharmacologically active substances by the toxins of *Cl. welchii* types B and C. 77-87.  
HOLDEN, H.F. The cobalt compounds of protoporphyrin. 89-92.  
COOKE, B., & BEST, R.J. The inactivating effect of salicylate on suspensions of some animal viruses; herpes, infectious myxoma, Shope fibroma, vaccinia, poliomyelitis. 93-9.  
BURNET, F.M., & FOLEY, M. Influenza virus infections of the chick embryo by the amniotic route; changes in the activity of influenza virus on continued amniotic passage. 101-5.  
COTTON, F.S. Studies in respiration the effect of varying the time of apnoea on the occurrence and extent of the oxygen trough of expiration. 107-11.  
SWAN, C. The route of transmission of the virus of infectious myxomatosis of rabbits to the central nervous system. 113-5.  
FANTL, P., & ANDERSON, C.M. The breakdown of hexose monophosphates in liver pulp. 117-21.  
SINGER, E. Experiments on the survival of rickettsiae in cell-free media. 123.  
SINGER, E. Studies on the hormonal antigens of the anterior pituitary gland. 125-32.  
SMITH, D.J.W. Studies in the epidemiology of Q fever; the transmission of Q fever by the tick *Rhipicephalus sanguineus*. 133-6.  
RAWLINSON, W.A. The effect of oxidizing agents on haemocyanin. 137-41.  
SWAN, C. Experimental poliomyelitis: the effect of faradic stimulation on the localization of paralysis induced by the intranasal inoculation of poliomyelitis virus. 143.  
BECK, A.B. Studies on the copper content of the milk of the sheep and cows. 145-50.  
SHAW, F.H. The action of alkali on the chemical and physiological properties of adrenaline. 151-5.  
HANSON, E. A. A note on the metabolism of chloroplast protein. 157-9.  
TURNER, A.W., & EALES, C.E. An aerobic, sporulating bacillus that forms rotating and migrating colonies. 161-6.

### 5. Cancerology

*J. Nat. Cancer Inst.*, 1940-41, 1:

- LITTLE, C.C. A review of progress in the study of the genetics of spontaneous tumor incidence. 727-36.  
ANDERVOORT, H.B., & McLENEY, W.J. Spontaneous tumors in a subline of strain C3H mice. 737-44.

COWDRY, E.V., & PALETTA, F.X. Changes in cellular, nuclear, and nucleolar sizes during methylcholanthrene epidermal carcinogenesis. 745-59.

1 SHIMKIN, M.B. Length of survival of mice with induced subcutaneous sarcomas. 761-5.  
COWIE, D.B., & SCHIEELE, L.A. A survey of radiation protection in hospitals. 767-87.  
HENSHAW, P.S. Biologic significance of the tolerance dose in X-ray and radium protection. 789-805.

BRYAN, W.R., & SHIMKIN, M.B. Quantitative analysis of dose-response data obtained with carcinogenic hydrocarbons. 807-33.  
MAVER, M.E., JOHNSON, J.M., & THOMPSON, J.W. The d-peptidase activity of serum as an alleged diagnostic test for cancer. 835-43.

2 GREENSTEIN, J.P., & JENNETTE, W.V. The depolymerization of thymonucleic acid by an enzyme system in normal and cancerous hepatic and mammary tissues and in the milk and sera of several species. 845-63.

### 6. Cardiology

*Mod. Concepts Card. Dis.*, 1941, 10:

BLOOMFIELD, A.L. Dysphagia with disorders of the heart and great vessels. No. 8, 1.

### 7. Chemistry

*Annual Rev. Biochem.*, 1941, 10:

BARRON, E.S.G. Biological oxidations and reductions. 1-30.

4 BERGMANN, M., & FRUTON, J.S. Proteolytic enzymes. 31-46.
